

Use of advanced seminars in the master's program (SPO 2023)

Verwendung von Hauptseminaren im Masterstudiengang (SPO 2015)

Stand: 23.07.2024

In the master's program in physics (SPO 2015 and SPO 2023), an advanced seminar (4 ECTS points) must be completed. This is either part of the major, the second major or the minor subject in physics. For this reason, it must fit thematically into one of these subjects. The following list contains an assignment of the advanced seminars to the subject areas.

The achievements will be recognized when registering for the subjects in the examination office upon presentation of a proof document (e.g. certificate/Schein or grade transcript). If you have any questions, please contact the examination board (Prüfungsausschuss).
